

DROP
DROP
DROP
DROP

There are a few reasons why we consider DROP a smart and not just funny product...

INSIDE / OUTSIDE

DROP is a Sun Lover...But it also enjoys the bad rainy days. Silicone is a cool and friendly material also for this reason. Enjoy it in your bathroom, outside, by your pool or where ever you would like it to stay.

A SMART WAY TO SAVE WATER

DROP comes with a flow restrictor already installed limiting the flow rate to 12 l/pm. This means that a nice 5 min shower will cost beloved Ms Jones just 60 liters. Consider that other shower heads on the market need a bigger flow rate to work as nice as DROP....and that a tub needs at least 150 liters.

SILICONE SAVE MY LIFE!

Silicone is the new rage in Italian bathroom designs. It's an eco-friendly material that is totally recyclable and available in any color. In the case of DROP it is available in BLUE, YELLOW, WHITE & BLACK. Silicone has a thermal stability of up to 250 degrees. It has a high resistance to oxygen, ozone and sunlight. It's a flexible material that is non-stick, has NO TOXICITY and low chemical reactivity.
